

Review: Coffee Ingredient Usage Forecasting Using MySQL, MongoDB, and Moving Average

I. SUMMARY RATING

4 - accept

II. STRONG POINTS OF THE PAPER

- 1) Numerous relevant references
- 2) The introduction provides a good overview of the paper
- 3) Clear practical motivation
- 4) Clear and accessible language

III. WEAK POINTS OF THE PAPER

- 1) Why choose a simple MA over alternatives such as AR or exponential smoothing?
- 2) The graphics are not entirely clear: why was a window size of 7 chosen? A concrete error metric would be helpful.
